

Exercise Chapter 15-2

Star formation in a spiral galaxy is mostly in the _____

The galaxy part composed mostly of relatively old stars is _____

The younger population of stars in a galaxy is _____

The old star population in a galaxy halo is _____

Objects in a galaxy orbiting in random directions are in the _____

Galactic objects orbiting in a common plane are in the _____

A galaxy of Hubble type S is a _____

A galaxy of Hubble type SB is a _____

A galaxy of Hubble type E is an _____

Standard candles are very useful for finding _____

Hubble's Tuning Fork diagram shows _____

The Local Group is a _____

Do Galaxies actually collide? _____

What two quantities does Hubble's Law relate? _____

What does a quasar look like on a photograph? _____

What did the Hubble Deep Field show? _____
