## Homework \#3: Phys 3320: Prof. Olness Spring 2012

Due Wedneday February 29, 2012

Hint: Use the sample mathematica file posted on the web page:
http://www.physics.smu.edu/~olness/www/12spr1320/3320/

1) By trial and error, find the coefficients $\left\{\mathrm{c}_{0}, \mathrm{c}_{1}, \mathrm{c}_{2}, \mathrm{c}_{3}\right\}$ of the following series,

$$
f(x)=c_{0}+c_{1} \operatorname{Sin}(2 \pi \bullet 1 \bullet x)+c_{2} \operatorname{Sin}(2 \pi \bullet 2 \bullet x)+c_{3} \operatorname{Sin}(2 \pi \bullet 3 \bullet x)
$$

to fit the function

$$
f(x)=x
$$

on the interval $\mathrm{x}=[0,1]$.
Plot your results with the exact function.
2) By trial and error, find the coefficients $\left\{\mathrm{c}_{0}, \mathrm{c}_{1}, \mathrm{c}_{2}, \mathrm{c}_{3}\right\}$ of the following series,

$$
f(x)=c_{0}+c_{1} \operatorname{Sin}(2 \pi \bullet 1 \bullet x)+c_{2} \operatorname{Sin}(2 \pi \bullet 2 \bullet x)+c_{3} \operatorname{Sin}(2 \pi \bullet 3 \bullet x)
$$

to fit the function

$$
f(x)=0 \text { for } x=[0,1 / 2] \text { and } f(x)=1 \text { for } x=[1 / 2,1]
$$

on the interval $x=[0,1]$.
Plot your results with the exact function.
3) By trial and error, find the coefficients $\left\{\mathrm{c}_{0}, \mathrm{c}_{1}, \mathrm{c}_{2}, \mathrm{c}_{3}\right\}$ of the following series,

$$
f(x)=c_{0}+c_{1} \operatorname{Sin}(2 \pi \bullet 1 \bullet x)+c_{2} \operatorname{Sin}(2 \pi \bullet 2 \bullet x)+c_{3} \operatorname{Sin}(2 \pi \bullet 3 \bullet x)
$$

to fit the function

$$
f(x)=1-|x|
$$

on the interval $x=[-1,1] .(|x|$ is the $\operatorname{Abs}(x)$.
Plot your results with the exact function.
Comment on your answer.
