TIPS:

- **Checkpoint problems and Post-class problems:** do first under the “Read, Study & Practice” tab to get the correct answers before doing them under the “Assignment” tab
- Use **Orion** to gauge your proficiency and monitor your progress for each chapter. This will require some effort at the beginning but it will save you time and energy down the road.
- Understand the **in-class concept questions** and the physical reasoning behind them. This will help you immensely for the midterm and the final.

Have a good semester!
