Homework 13

Expectations for the quality of your handed-in homework are available at <http://www.physics.smu.edu/sekula/phy1308/HomeworkPolicy.pdf>. Failure to meet these guidelines will result in loss of points as detailed in that document. This assignment covers material from Wolfson Chapter 31.

The total assignment is worth 50 points.

This homework is due by 5pm on Tuesday, November 30 (place in my mailbox in Fondren Science 102)

Reading Assignment:

Chapter 31.1

Required Problems from Wolfson

These are **required problems that are part of the official homework assignment.**

- CH31-17 (5 Points)
- CH31-18 (15 Points)
- CH31-20 (10 Points)
- CH31-38 (20 Points)

Optional Warm-Up Problems from Wolfson

These are not required but are meant to help you warm up to the problems that are required. They are odd numbered, and solutions to the odd-numbered problems are available in the back of the book and fully detailed in the student solution manual.

- CH31-19
- CH31-21
